PROJECTS

Smart Contact Manager (GitHub)
- Built a secure and scalable web app to manage personal contacts with fields like name, email, number, LinkedIn, GitHub, and address.
- Integrated Google/GitHub OAuth2 login, full contact CRUD operations, and cloud storage using Cloudinary.
- **Used Java, Spring Boot, Spring Security (JWT/OAuth2), Spring Data JPA, MySQL, Thymeleaf, and Tailwind CSS for end-to-end development.**

URL Shortener (GitHub)
- Built a full-stack web application to shorten long URLs with custom keys, expiration time, and redirection analytics.
- Implemented user authentication and role-based access (admin/user) using Spring Security.
- **Tech: Java, Spring Boot, Spring Security, JPA, Bootstrap CSS, Thymeleaf, MySQL, Maven**

To-do List (GitHub)
- Built this project to keep track of tasks that need to be done. This application will act like a task keeper where the user would be able to enter the tasks that they need to do. Once they are done with their tasks, they can also remove them from the list. They can also edit the entered Tasks.
- **Tech:** Spring Boot, JSP, JPA, Java
