

RUDRAPRASAD SATAPATHY

Java Backend Developer | Spring Boot | Microservices

+91-7008348676 | rudraprasadsatapathy21@gmail.com | Bhubaneswar, India
[linkedin.com/in/rudraprasad-s](https://www.linkedin.com/in/rudraprasad-s) | github.com/Rudraprasadd

SUMMARY

Java Backend Developer with hands-on experience designing REST APIs and Spring Boot microservices, including JWT/OAuth2 authentication, Apache Kafka messaging, and gRPC inter-service communication. Skilled in Docker containerization, relational database design (MySQL, PostgreSQL), and unit testing with JUnit and Mockito. Oracle SQL Certified Associate and Wipro Java Full Stack certified; available to join immediately as a full-time Software Developer.

TECHNICAL SKILLS

- Languages:** Java, SQL
- Backend & Frameworks:** Spring Boot 3, Spring MVC, Spring Data JPA, Spring Security, Spring AI, REST APIs, gRPC, Microservices Architecture, API Gateway
- Security & Auth:** JWT, OAuth2 (Google, GitHub), Keycloak, Role-Based Access Control (RBAC)
- Databases:** MySQL, PostgreSQL
- Messaging & Communication:** Apache Kafka (event-driven), gRPC, REST, Server-Sent Events (SSE)
- Generative AI:** RAG (Retrieval-Augmented Generation), OpenAI API, Vector Embeddings, Semantic Search
- Testing:** JUnit, Mockito, Unit Testing
- DevOps & Tools:** Docker, Git, GitHub, Maven, Gradle, Swagger/OpenAPI, Cloudinary, CI/CD Fundamentals
- Core Concepts & Practices:** OOP, SOLID Principles, Collections, JDBC, Exception Handling, Agile/Scrum

PROJECTS

DevPilot | AI-Powered GitHub Codebase Assistant (RAG)

Java 21, Spring Boot, Spring AI, OpenAI API, PostgreSQL, pgvector, GitHub OAuth2, Next.js, React, TypeScript, Docker | [GitHub](#)

- Built a full-stack Retrieval-Augmented Generation (RAG) assistant that answers questions about GitHub repositories with source-file citations.
- Developed an asynchronous indexing pipeline (GitHub REST API, chunking, OpenAI embeddings, PostgreSQL pgvector with HNSW and cosine similarity) powering repository-scoped semantic search with top-8 retrieval via Spring AI, so only relevant code chunks reach the LLM.
- Streamed LLM responses to the Next.js UI via Server-Sent Events (SSE); secured the app with GitHub OAuth2, Spring Security, repository ownership validation, and encrypted GitHub token storage.

Patient Management System | Spring Boot Microservices

Java, Spring Boot, REST APIs, Apache Kafka, gRPC, Docker, JWT, API Gateway, MySQL, PostgreSQL | [GitHub](#)

- Designed a microservices-based patient management platform with JWT authentication, role-based access control, and Apache Kafka for asynchronous, event-driven messaging between services.
- Implemented gRPC for high-performance inter-service communication and REST APIs for external client access, reducing service coupling.
- Containerized all microservices with Docker and routed traffic through a centralized API Gateway; used MySQL and PostgreSQL for polyglot persistent storage across services.

Smart Contact Manager | Spring Boot Web Application

Java, Spring Boot, Spring Security (JWT/OAuth2), Spring Data JPA, MySQL, Thymeleaf, Tailwind CSS | [GitHub](#)

- Built a secure, scalable contact management platform with Google and GitHub OAuth2 login and JWT-based session handling.
- Implemented full CRUD operations backed by Spring Data JPA and MySQL, with server-side validation and structured exception handling.
- Integrated Cloudinary for cloud-based image storage and delivery, decoupling media handling from the application server.

URL Shortener | Spring Boot Web Application

Java, Spring Boot, Spring Security, JPA, Bootstrap CSS, Thymeleaf, MySQL, Maven | [GitHub](#)

- Built a full-stack URL shortener with custom short-link generation, expiration handling, and role-based access control (admin/user) using Spring Security.
- Designed the relational schema and JPA entity mappings in MySQL to support link analytics and expiration lifecycle.

EXPERIENCE

Junior GenAI Intern — Qualitas Global, Pune

Dec 2025 – Mar 2026

- Completed the Junior GenAI Internship Program, gaining hands-on exposure to Generative AI and LLM concepts through AI/ML pipelines.
- Independently built DevPilot, a RAG-based AI coding assistant, implementing vector embeddings, semantic search, and GitHub OAuth2 using Java, Spring Boot, Spring AI, OpenAI API, pgvector, and Next.js/React.
- Supported AI/ML data annotation and QA workflows, annotating and validating 500+ image and text data points daily.

Java Intern — Sentientware Tech Solutions, Berhampur

Jun 2025 – Jul 2025

- Completed a 30-day intensive Core Java internship building and debugging Java applications, with focus on OOP, JDBC, Collections, and exception handling.
- Delivered working modules under mentorship, translating requirements into tested, maintainable Java code.

EDUCATION

Bachelor of Technology in Computer Science & Engineering

Aug 2022 – Jun 2026

GIET University, Gunupur

CERTIFICATIONS & AWARDS

- Oracle Database SQL Certified Associate — Oracle
- TalentNext Java Full Stack — Wipro
- Master Spring Boot 3 & Spring Framework 6 with Java — Udemy
- Java Training — Spoken Tutorial, IIT Bombay
